

IATA/UFTAA FOUNDATION DIPLOMA

The IATA/UFTAA Foundation Diploma Course provides tomorrow's air transport leaders the latest knowledge and skills needed to address the industry's ongoing challenges.

IATA Open Book Exam Format

From March 2005 onwards, the IATA/UFTAA exams will be administered using an "open book" format. Students will be allowed to bring their own course textbooks, PAT training extract, TIM, OAG and Thomas Cook extracts to the exam for personal use in writing the exams (no personal notes are allowed in the exam hall).

****NEW** Guided Distance Learning**

A self-paced guided learning programme facilitated by our very own E-tutor. Students will be guided via Email, Phone and 'face to face' review sessions. Students will be given a lesson schedule to follow through their studies, additional learning guides, assignments and past year questions will also be used to prepare students for the final examination.

IMPORTANT

An open book exam format will not alter the level of difficulty of the examination and students must continue to diligently study course content prior to sitting the exams. It will not be possible for examinees to perform successfully on these exams without adequate preparation

Our Course details
